

NON - Contact Forehead IR Thermometer

Pioway Medical

DT-8809C

Normal
32~37.3°C
Green backlight

On the high side
37.4~38°C
Orange backlight

Fever
38.1~39.1°C
Red backlight

DT-8809C ✓

It is a necessary product for you to travel at home and measure temperature quickly.

No need to come into contact with cleanliness and hygiene

Infrared accuracy measurement and temperature measurement

One machine can be used for multiple purposes.

In addition to taking body temperature we also take care of the safety of the whole family

Take body temperature

The whole family can take body temperature as early as possible to prevent colds.

Measure water temperature

Measure the temperature of the bath water to make the baby safe and comfortable

Measure milk temperature

Measure the temperature of milk to make sure it is safe to eat

Measure room temperature

It is convenient to add clothes by measuring the ambient temperature

Functional features:

- The use of high-precision infrared sensor, stable and reliable performance;
- Strong environmental adaptability, complex environment does not affect the normal use;
- Humanized product design to ensure accurate measurement data;
- Change the temperature units of Celsius and Fahrenheit at will;
- Tricolor backlight display reminder, the reading is clear;
- Can automatically save data and shutdown, more power saving;
- The utility model has a wide range of uses and is suitable for the use of people and things.

Optimum Distance

Quick non-contact Temperature detection between the optimum distance stated above.

Applications:

- Measure body (forehead) temperature
- Monitor individuals for temperature change
- Non-contact technique reduces potential spread of diseases from using contact devices

Note: This thermometer is intended for scanning individuals or monitoring an individual for potential elevated temperatures. It is not a substitute for a clinical thermometer. Always use a clinical thermometer when high accuracy body temperature measurements are required.

IR Thermometers that detect elevated body temperature will vary with various factors and should not be relied upon as the sole determinant of a person's body temperature. Use of additional medical devices and/or healthcare professionals will be needed to properly diagnose the condition of persons in any health screening assessment to identify elevated body temperature for any person.

Model	DT-8809C
Measure distance	3cm/1.18-1.97 inch, contactless
Measurement mode	Body temperature measurement mode, body temperature measurement mode
Measuring range	Body temperature mode: 32°C-43°C (89.6°F-109.4°F)
	Temperature mode: 0°C-118°C (32-244.4°F)
Measuring precision	Body temperature mode: (35-42) °C / (95-107.6) °F 以外±0.3°C/0.54°F
	Temperature mode: (35-42) °C / (95-107.6) °F 以内±0.2°C/0.36°F
Display resolution	0.1°C/0.1°F
Display screen	LCD display screen
Backlight	Tricolor high brightness backlight
Operating environment	Temperature 5°C~40°C (41°F-104°F) Humidity 85%
Storage environment	Temperature -20°C~-55°C (-4°F-131°F) Humidity 93%
Power supply	DC3.0V (2 R03 AAA 1.5V batteries)
Energy consumption	Shutdown status < 6uW
	Boot measurement status < 45mW
Power hint	Low battery charge prompt
Memory function	32 groups of measured values can be memorized.
Unit conversion	Degrees Celsius (°C) / Fahrenheit (Fahrenheit) can be selected
Automatic shutdown time	Automatic shutdown without any operation within 30 seconds
Product size	95mm*42.5mm*156mm (Length * width * height)
Product weight	Gross weight 232g
Service life	Three years
