

## INFECTIOUS DISEASE

**New**

### One Step HIV / HBsAg / HCV Serum Test Panel

HIV, Hepatitis-B and HCV are three very common infectious diseases. And in many settings, the screening tests of the three infections are administered together. And, this combined test panel is a rapid direct binding test device, designed for the visual detection of the antibody to human immunodeficiency virus (HIV), hepatitis B surface antigen (HBsAg) and Hepatitis C (HCV) antibody in serum, plasma and/or whole blood specimens, as an aid in the diagnosis of HIV, hepatitis B and hepatitis C infection.

#### Features

1. Take less than 20 minutes to be sure;
2. Test results can be read visually without any instrument;
3. Very convenience to detect HIV antibodies, HBsAg and HCV antibodies with one specimen.
