

LANCETS

Single-use Blood Lancets

Are manufactured with the greatest degree of precision to ensure a consistent blood sample for glucose monitoring. Featuring the highest quality needle, a tri-bevel tip dramatically reduces trauma when skin is punctured. These lancets also offer universal style compatible with nearly all lancing devices. The plastic shield ensures sterility until the lancet is used. **LANCETS** Are precisely manufactured with a tri-beveled ultra-thin tip for smooth, controlled skin penetration. High quality honed angles add to its superior performance. It takes a powerful microscope to see the precision of our lancets and you will appreciate the advantage with every sample. All **LANCETS** are designed for more comfort, adequate volume and less callous build-up.

! HOW TO USE **LANCETS**

Please read instructions carefully before use.
Do not use if protective cap has been previously removed!
