

URINE REAGENT STRIPS

Urine Reagent Strips

Atlas Link supplies Urinalysis Reagent Strips up to 11 parameters: ascorbic acid, glucose, bilirubin, ketone, specific gravity, blood, pH, protein, urobilinogen, nitrite and leukocytes. Certain configurations of strips can be read instrumentally with some mainstream Urine Analyzers in the market.

Features

1. Dip-and-read tests, all results are available within 2 minutes;
2. High and reliable sensitivity;
3. Qualitative results are easy to read with or without instrumentation;
4. No Extra reagents is needed;
5. Available in Single or Multi-Parameter strips, up-to 11 parameters (Refer to table 1).
6. Popular combinations are available (Refer to table 2); costumed combinations can be arranged according to Customer's selection.

Table 1 Substances to be tested

NO.	Substance Tested	Performance Characteristics	Reading time
1	Glucose (GLU)	4-7mmol/L	30 seconds
2	Protein (PRO)	0.15-0.3g/L	60 seconds
3	Ketone (KET)	0.5-1.0mmol/L	40seconds
4	Leukocytes (LEU)	5-15 cells/ μ L	2 minutes
5	Nitrite (NIT)	13-22 μ mol/L	60 seconds
6	Urobilinogen (URO)	3 μ mol/L	60 seconds
7	pH	5 to pH8.5	60 seconds
8	Blood (BLD)	60-620 μ g/L	60 seconds
9	Specific Gravity (SG)	1.000 to 1.030	45 seconds
10	Bilirubin (BIL)	7-14 mmol/L	30 seconds
11	Ascorbic acid (VC)	0.6mmol/L	60 seconds
